The model
chooses what to search, what to read and what to claim
Question
Question type
once, at the start
The transcript
every call the model made and every result that came back · every answer it tried and its verdict
one call per turn
Search
passages come back
Read
the passage in full
Record evidence
Submit an answer
every passage, judged or not
kept, or turned away
turned back
The orchestrator
keeps the record, rules on what is delivered
Nugget check
quotation, then entailment
Evidence gate
weighed against the whole record
Answer
with the confidence the orchestrator computes
The record
every passage and how it was judged · the nuggets kept · the answer it ended on and how sure it was
the two halves of one trace
